

ENVIRONMENTAL POLICY AND ACTIONS

For Arminda Hotel and SPA an environmentally responsible behavior is a priority. We are committed to pursuing an approach of environmental responsibility by finding innovative ways to do more with less, we aim to drive sustainability efforts in order to continue positively impacting the environment in which we operate.

Saving energy, water, proper waste management and protection of the local wildlife is a primary concern of the management of the hotel. For this reason:

- a. We use solar energy for water heating purposes and reduce energy loss with full insulation of the transfer pipes.
- b. We monitor the energy and the water consumption in regular basis, to be able to find and improve rapidly any design or other defect in our installations.
- c. We are replacing our lamps with new energy-efficient ones, providing reduced energy consumption.
- d. We use LPG in the kitchen.
- e. We only select detergents that are eco –friendly.
- f. We use the magnetic key cards as in-room power enablers, so as to stop the operation of all electrical facilities, except the refrigerator and the red charger plug.
- g. We discard the burnt cooking oil to certified recycling company.
- h. We actively recycle! We return all packaging, plastic, paper, bottles and other materials for recycling in cooperation with the Municipal Recycling of Hersonissos.
- i. We return all used batteries in cooperation with the company "AFIS" and we recycle all electrical and electronic equipment, in cooperation with the company Creta Phoenix.
- j. We use magnetic sensors in every room so that the air conditions could only work if the doors and windows of the room are closed.
- k. We provide training to our staff so they can work in an environmentally responsible way and act properly.
- l. We provide our guests information about the local marine eco-system and advise them ways they can help to protect it.

For Arminda Hotel and SPA,

Responsible for environment and sustainability
